

IRT Intelligence Platform

Dashboard-first portfolio intelligence + study similarity

Steering Committee Snapshot

Faster study start-up

Fewer repeat defects

Better delivery predictability

Reduced reporting overhead

IRT Intelligence Platform

Dashboard-first portfolio intelligence + study similarity

Executive Portfolio Health

Global → Client → Study drill-down
Instant risk concentration view

New Study Similarity

Upload URS → Top-2 closest studies
Reuse known risk & mitigation

Risk Linking (Evidence)

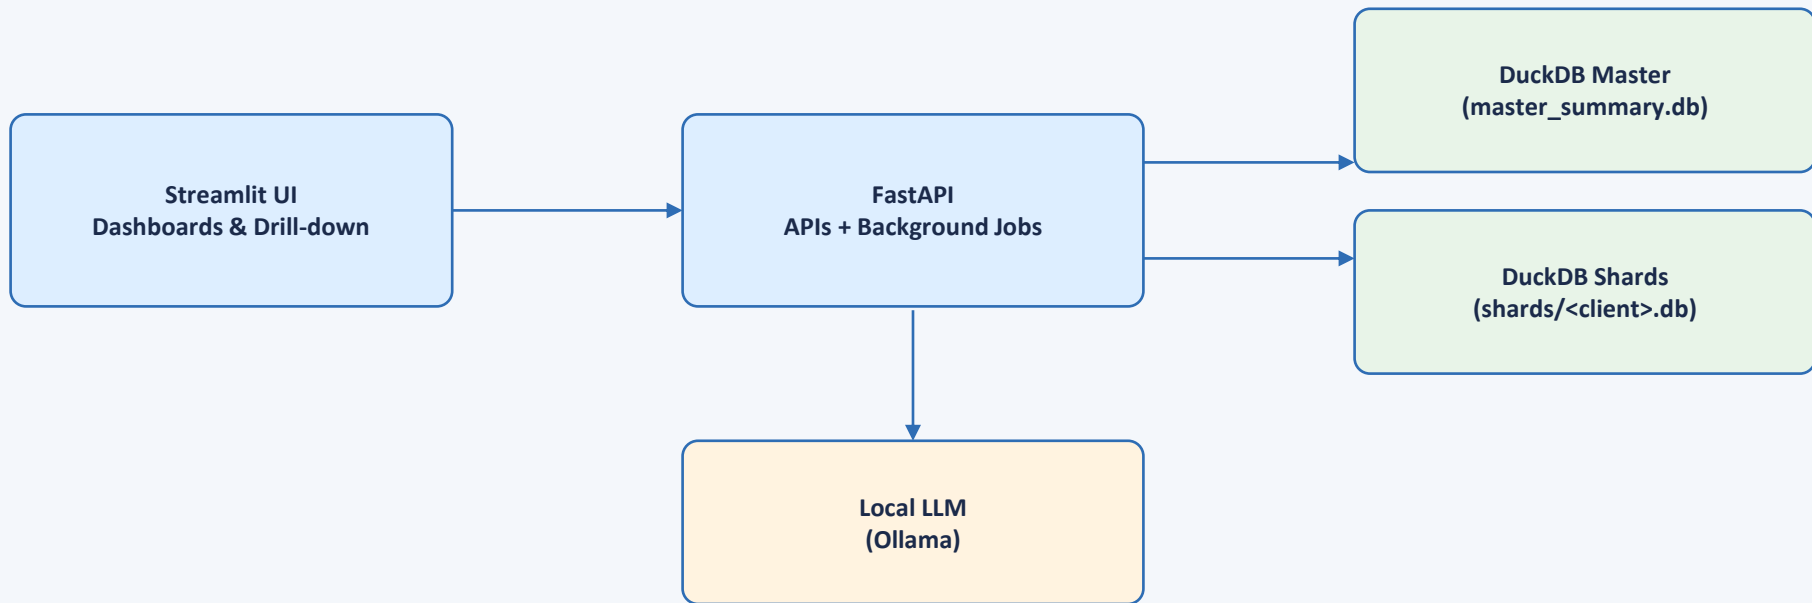

Requirements ↔ SPIRA ↔ JIRA ↔ Effort
Component-level risk badges

Role Dashboards

Role-based views
Suggested studies via JIRA activity

Architecture Overview

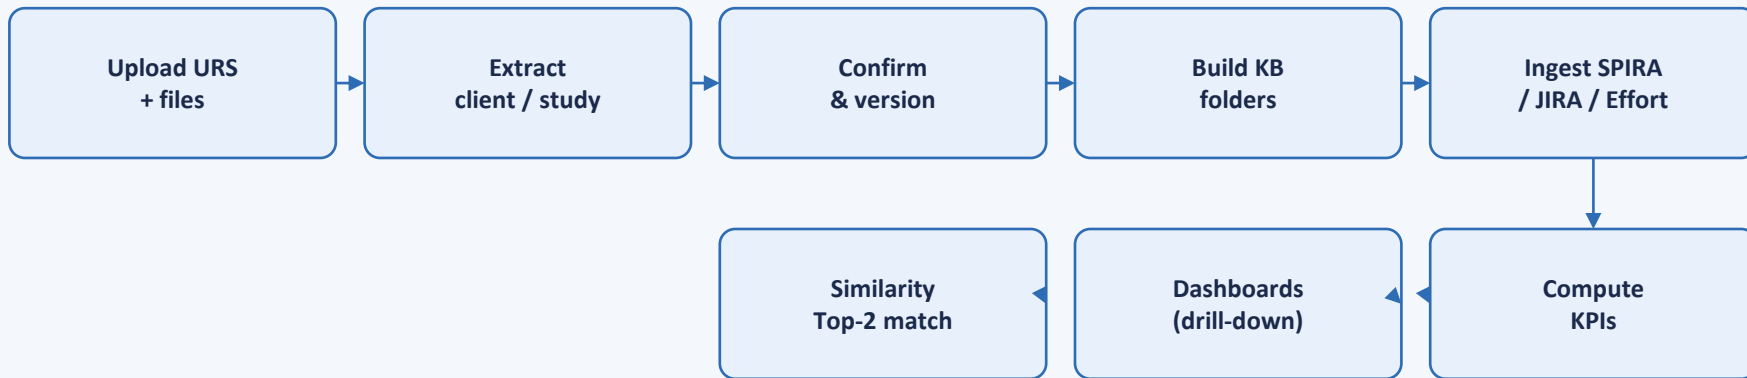

Local-first • Secure • Scalable

Principles: SQL-first • vector-second • LLM-last | Non-blocking UI | Local-only data sovereignty

Approach (POC → Scale)

Minimal text • Maximum flow

✓ Pilot (20 studies)

Prove ingestion + dashboards + similarity
Confirm KPI usefulness & adoption

■ Scale (500+ studies)

Same pipeline • client shards • federated metrics
Add Validation + AI search

Current Status

Honest view of where things stand

Architecture & approach	Done
Steering committee sign-off	Done
URS ingestion pipeline	In Progress
DuckDB schema (master + shards)	In Progress
Streamlit dashboard scaffolding	In Progress
Study similarity (top-2 matching)	Planned
KPI computation layer	Planned
Ollama / LLM integration	Planned
Role-based dashboards	Planned
